+91 7355284571 | maroofhusain2005@gmail.com | LeetCode | HackerRank | GitHub | LinkedIn | CodeChef

SUMMARY

Computer Science undergraduate with experience in full-stack web development, AI, and blockchain technologies. Skilled in Java, Python, JavaScript, React, Node.js, and Flask, with a strong foundation in Data Structures & Algorithms and core CS concepts. Passionate about building scalable software and solving real-world problems.

EDUCATION

B.Tech, Computer Science & Engineering *2023 – 2027*
Dr. A.P.J. Abdul Kalam Technical University *Lucknow, UP*
CGPA: 7.9 / 10

PROJECTS

DataKart – Decentralized Data Aggregation Marketplace *Live Demo | GitHub Repo*
Next.js, React, Tailwind CSS, Node.js, Flask, Solidity

- Built a decentralized marketplace enabling users to securely monetize datasets for AI training while preserving privacy.
- Developed an AI-powered data analysis pipeline using Llama-3, BLIP Vision AI, and NudeNet for tagging, valuation, NSFW detection, and duplicate prevention.
- Implemented Solidity smart contracts on Polygon Amoy for secure POL/USDC reward distribution.
- Designed a scalable frontend architecture using Next.js 14, React, and Tailwind CSS with an integrated AI chatbot assistant.
- Developed a Python/Flask backend for metadata extraction, content moderation, and perceptual hash-based duplicate detection.
- Integrated Web3 technologies including RainbowKit and Wagmi for wallet connectivity and blockchain interaction.

Flatmate Finder *Live Demo | GitHub Repo*
React, Vite, Node.js, Express, MongoDB, Llama AI

- Developed a full-stack web application to help users find compatible flatmates and browse property listings.
- Implemented AI-powered roommate matchmaking using Llama-based models to recommend compatible users based on preferences and interests.
- Built a JWT-based authentication system with protected routes for dashboards, profiles, and property management.
- Developed RESTful APIs using Express and MongoDB for user registration, login, listing management, and matchmaking workflows.
- Designed a responsive frontend interface using React, Vite, and React Router for seamless navigation and improved user experience.
- Integrated MongoDB with Mongoose for efficient storage and retrieval of user profiles and property data.
- Configured a deployment workflow using Vercel for frontend hosting and Render for backend API services.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, SQL
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Frameworks: React, Django, Spring Boot, Flask, Express.js
Developer Tools: Git, Docker, AWS, VS Code, PyCharm, Eclipse, IntelliJ
Libraries: Pandas, NumPy, Matplotlib, TensorFlow, Redux, Bootstrap, jQuery

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (Forage, 2024)
- ChatGPT for DevOps – Udemy (2024)
- Tata GenAI Powered Data Analytics – Completion Certificate
